* St. Louis County utilized 28 different ballot styles so that results could be reported by congressional district and township even though the ballot for each precinct was identical. Eighty-seven polling places had at least two different ballot styles and at one location a number of voters received the incorrect ballot style. For this location the totals should be read in connection with each other. This had no impact on the candidate totals.

0104 AP4, 28, 47 & 1750 MID 50

=====

* St. Louis County utilized 28 different ballot styles so that results could be reported by congressional district and township even though the ballot for each precinct was identical. Eighty-seven polling places had at least two different ballot styles and at one location a number of voters received the incorrect ballot style. For this location the totals should be read in connection with each other. This had no impact on the candidate totals.
